

Hardware

may be the last thing fitted,

but it's where the eye falls,

the part we most frequently

touch and operate,

and the aspect by which

we judge overall quality.

Fab&Fix

The Ultimate in Window & Door Hardware

We have great respect for our customers, because they take enormous pride in what they do. It's the reason our team works hard every day to create the ultimate in window and door hardware, with a level of service to match.

Being the ultimate means never accepting "good enough" and always striving to do things better. We didn't accept that handles, hinges, letter plates and knockers had to come in different colours - we launched the industry's first set of perfectly matching hardware. We didn't accept that chrome products had to be less durable - we invented Hardex Electro finishes, which can withstand up to 1,000 hours of salt spray testing.

The result of this approach is hardware that looks exceptional, and never lets you down - we call it Form & Function. It's why our customers can be proud to fit Fab&Fix, and their customers can be proud to make us part of their homes and workplaces.

Labour of love

Products start life at our UK design studio in Coventry. With over 70 years of combined industrial design experience, our team creates beautiful products that also meet the highest standards of engineering quality, ease of installation, functionality and durability.

This labour of love has rewarded us with over 75 patents and registered designs and a host of industry awards. Whether a new stock line or bespoke commission for an individual customer, our design team applies the same standards of excellence.

Beyond the limits

At the same UK site, our dedicated research and testing laboratory puts all new designs through a rigorous process of endurance and functionality testing.

Only designs that meet our own discerning standards, often beyond those demanded by the industry, go through to production.

Built to last

Fab&Fix products are manufactured to requirements more frequently associated with cars and aeroplanes than door and window hardware.

Our dedicated factory in China works to internationally recognised quality standards. Every run of products is quality checked during production, before shipping and again on arrival at our UK distribution centre - that's why we confidently stamp every box with the Fab&Fix mark of quality.

Quality takes time

5 years in development, Hardex Electro finishes are among the most resilient and attractive in the world today.

Time is everything in our unique process, it takes over 24 hours to plate a single handle.

Meticulous preparation of the surface material is followed by a complex series of chemical baths, each submersion calculated to the second. Only then is the product ready for a Hardex Electro plate to be applied before curing in extreme temperatures.

It's a lot of effort, but we hope you'll agree it's worth it.

Hardex Electro* test results versus industry norms

TEST	HARDEX ELECTRO*	INDUSTRY NORM
Corrosion Resistance	1,000 hours	240 hours
UV Light Resistance	500 hours	120 hours
Abrasion Resistance	18 litres of sand	5 litres of sand
Smear Resistance	1,000 double rubs	100 double rubs
Sweat Resistance	4 passes	Zero passes
Acetone Rub	500 times	No data
Adhesion Cross Cut Check	1mm for 100 squares	No data
Pencil Hardness	4N - 5N	2N - 3N

*The tests were carried out on Hardex Gold finish

Customer Care

A black and white photograph of a showerhead spraying water onto a rose. The showerhead is in the upper right, and the water is spraying downwards. The rose is in the lower left, and the background is black. The text is overlaid on the image.

Here for you

We're dedicated to matching the quality of our products with the quality of our service. From discussing your initial requirements to handling orders and our commitment to next day delivery, you'll always find our team knowledgeable, friendly and professional.

It doesn't stop there, we are industry leaders in after sales care. From technical support and training to marketing support packages, we do whatever it takes to help give our customers the competitive edge.

Key to Icons

These icons will help you to select the most appropriate hardware for your needs. They clearly highlight key features and the industry standards our products meet or exceed.

This product is covered by our 10 year mechanical guarantee.*

This product has passed the independent PAS23 British Standard for weather resistance as one component of a complete door set.

This product has successfully completed 50,000 cycles replicating everyday use without deterioration or failure.

This product has passed the independent PAS24 British Standard for security as one component of a complete door set.

This product has successfully completed 100,000 cycles replicating everyday use without deterioration or failure.

This product is accredited by Secured By Design and meets a Police preferred specification.

This product has successfully completed 200,000 cycles replicating everyday use without deterioration or failure.

This product has been tested and approved by the British Board of Agrément to meet construction industry standards.

The finish on this product has passed 480 hours of salt spray testing.

This product has been awarded the Gold Standard of security classification by the Master Locksmiths Association's Sold Secure scheme.

The finish on this product has passed 1,000 hours of salt spray testing.

This product has features that make it suitable for fire safety applications.

This product has features that provide additional benefits for the disabled or elderly.

This product has features that enable it to be used for egress applications.

Form Function

The Perfectly Matching Home

When creating a beautiful and stylish home, details are everything. A front door with matching hardware creates a great first impression.

With Fab&Fix it doesn't have to stop at the front door. Our ever growing set of interior fittings perfectly match with the rest of our range – not just in colour, but in form as well.

With three Series of products to choose from, every homeowner can find the details that will complete their home, whatever their personal style or budget.

Hardware may be the last thing fitted, but it's where the eye falls, the part we most frequently touch and operate, and the aspect by which we judge overall quality.

The P Series

The perfect balance of

Price  Performance

- Die cast aluminium construction
- More than 70 products
- Every product available in 4 perfectly matching finishes

The P Series

Aficionado Inline Locking

Features & Benefits

- **Die cast aluminium lever**
The perfect balance of price and performance
- **Solid zinc baseplate**
Stability and security
- **Heavy duty sprung latching block**
Positive click on closing
- **Long handle with 50mm window clearance**
Greater leverage and easy to operate without catching a hand on the window
- **Classic design with a contemporary twist**
Create an elegant and stylish window
- **Patented cover caps with colour coordinated finish**
Perfectly matching components, even down to the smallest details

White

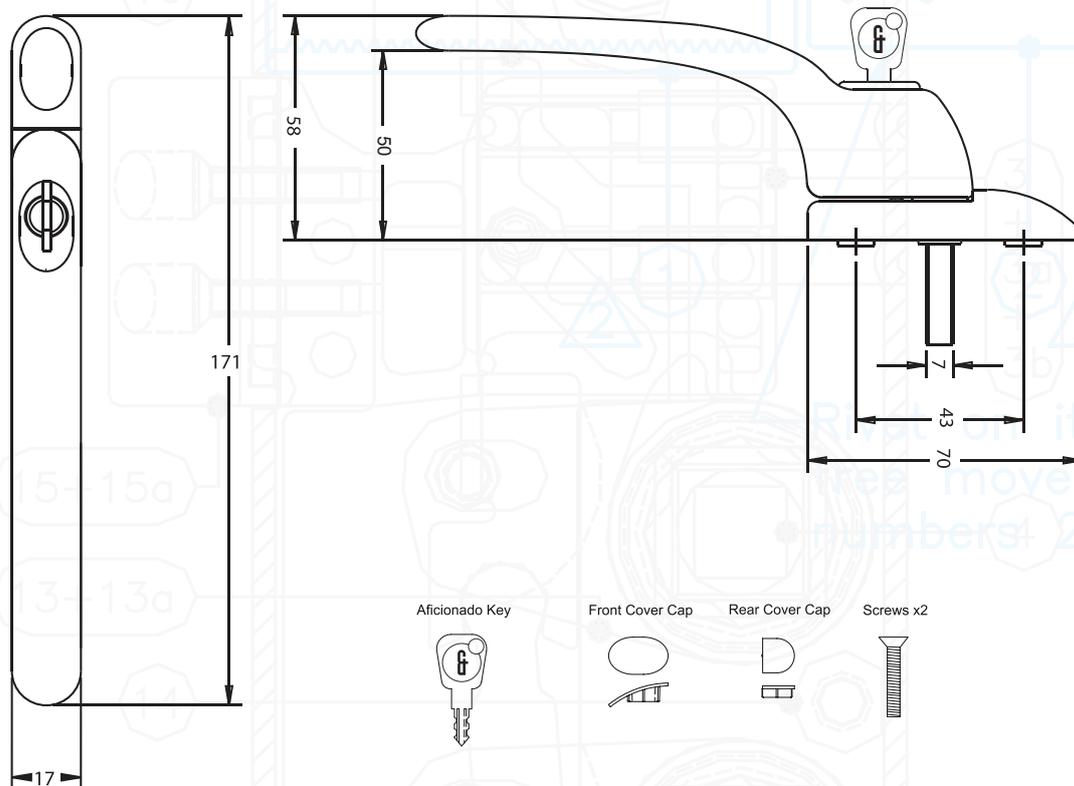

Black

Silver

Gold

Fab&Fix

Aficionado Inline Locking

All dimensions are shown in millimetres

Additional Benefits

- **Key clicks into place when inserted**
Won't fall out of the lock, even when pivoting the lever
- **Slotted spindle (40mm version only)**
Allows cropping to 5mm increments

Technical Specification

Designed for PVC-U and Timber windows

Certified to BS 7950: 1997

All finishes salt spray tested to 480 hours
(BS EN 1670: Class 5)

Tested to 50,000 cycles

Ashford Dummy Lever Lever

External Lever

Features & Benefits

- Solid die cast aluminium construction with weight balanced spring cassette
The perfect balance between price and performance
- Flexible purpose component
Enables all aspects of a job to be completed as a perfectly matching set
- Sculpted ergonomic lever and low friction nylon bush
Easy to grip and smooth action
- Wide backplate
To accommodate larger cylinder preparation
- Supplied with screw and spindle pack to suit 60-70mm profiles
Everything needed for installation included
- Colour coordinated screw heads
Perfectly matching hardware, even down to the smallest details

Ashford Dummy Lever Lever

All dimensions are shown in millimetres

Additional Benefits

- **Baseplate in common with all Ashford handles**
Same routing detail regardless of product variant chosen
- **Supplied fully assembled**
Simple and quick installation, no need to fit springs or lever
- **Silicon Site-Protectors available**
Ensures perfect condition after installation
- **Each part packaged in a separate chamber, but supplied as a set**
No scratching of parts during transit

Technical Specification

Designed for PVC-U and Composite doors

Supplied with fixing kit to make external lever fixed

All finishes salt spray tested to 480 hours
(BS EN 1670: Class 5)

Tested to 200,000 cycles

92mm PZ

Includes screw and spindle pack suitable for 60mm - 70mm profiles (1 x 8mm x 120mm spindle, 2 x M5 x 70mm colour coordinated machine screws, 2 x M5 x 80mm colour coordinated machine screws)

Anchorage Intelligent Strength

Features & Benefits

- **Classic lift on/lift off or lift out flag design**
Traditional assembly, ease of fitting, allows sash removal in low ceiling applications
- **Long reach sash plate with integral fixing lugs**
Optimal strength and stability with 4 screws locating into the profile's steel reinforcing
- **True 3D adjustment with supplied allen keys**
Allows for final tweaking and perfect sash alignment
- **Available in 14mm, 17mm and 21mm stack heights**
Works with all major profile systems
- **Security sash cover cap and extended pin**
Prevents intruder from removing cover cap and lifting the door out

Anchorage Intelligent Strength

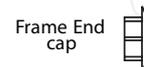

Sash frame rebate height
Suitable for Sash Frame sizes of 14.0mm and higher

COMPONENT PARTS LIST

Packers
1.5/2.0/3.0mm

All dimensions are shown in millimetres

Additional Benefits

- **Dual mount fixings for optional use of M6 screws**
For an even stronger hold
- **Tray based packaging, 3 hinges per tray**
Convenient full door assembly
- **30kg sash weight load per hinge**
Support up to 90kg with 3 hinges
- **Individual or telescopic fixing jigs available**
Faster, more accurate fabrication
- **Suitable for interior or exterior fitting**
Convenience for the fabricator

Technical Specification

Designed for PVC-U doors

All finishes salt spray tested to 480 hours (BS EN 1670: Class 5)

Tested to 200,000 cycles

Tested as part of a complete door set that successfully achieved PAS23

Tested with 3 hinges up to 90kg sash weight

Horizontal adjustment of +/-8mm; height adjustment of +4mm/-2mm; compression adjustment of +/-1.5mm

Includes 3mm, 2mm & 1.5mm packers

Nu Mail Fire

Additional Benefits

- Secure through fixing ensures letterplate can only be removed from the inside of the house
Prevents burglars gaining access to the cylinder internally
- Optional restricted opening with the addition of a PAS24 Letterplate Restrictor
Possible to restrict the opening angle, or lock the flap shut

*Fire resistance requires fitting of intumescent strip which has been tested in conjunction with the letterplate on a timber door section to achieve 60 minutes of fire resistance. This is an indicative test and the door fabricator may need to conduct their own fire tests on a complete door set in order to meet specification requirements.

**For best acoustic and weather performance we recommend installing the product with a rubber gasket

The E Series

Elegance  Endurance

- Die cast zinc construction
- Over 160 products
- Every product available in 8 perfectly matching finishes

The Connoisseur

The handle that started it all

When Fab&Fix set out to develop the ultimate in window and door hardware, the Connoisseur inline espag handle was the first result.

True to our principles of Form & Function, its technical excellence was matched by the first sweeping curves seen on a product of this type. Only available in white at launch, it's become a testament to the longevity of our design.

Now available in inline, offset and cranked variants, in a wide range of colour finishes, over 15 million Connoisseur handles are installed in homes around the world.

The Connoisseur

Key clicks into place and won't fall out, even when pivoting the lever

Solid die-cast construction gives a sturdy feel

Long handle with 50mm window clearance for easy operation

Patented bi-material cover caps with colour co-ordinated finish

Classic design with a contemporary twist

Heavy duty sprung latching wedge gives a positive click on closing

40mm slotted spindle available for easy cropping

The E Series

Connoisseur Inline Locking

Features & Benefits

- Solid die cast zinc construction
Heavyweight handle with sturdy feel
- Heavy duty sprung latching wedge
Positive click on closing
- Long handle with 43mm window clearance
Greater leverage and easy to operate without catching a hand on the window
- Classic design with a contemporary twist
Create an elegant and stylish window
- Patented cover caps with colour coordinated finish
Perfectly matching components, even down to the smallest details

Nu Mail Fire

Features & Benefits

- Letterplate to suit doors 40-80mm thick
Suits a wide range of door thicknesses, including 44mm composite doors
- Fully colour matched die cast zinc flap and die cast zinc frame
Quality and durability you can see and feel
- Independently tested to achieve 60 minutes of fire resistance when combined with intumescent strip*
Highly flame resistant product suitable for specification
- Anti-snap flap opens to 180° with fully sprung return
Easier to operate, no broken flaps, even with Sunday papers
- 12" letterplate with a 10" aperture
Meets Royal Mail standards, will easily take A4 size post
- Fully weather sealed (with rubber gasket)**
No draft, no rain water
- Outstanding acoustic insulation**
Perfect for flats, or houses near busy roads

Fab&Fix

Nu Mail Fire

Additional Benefits

- Secure through fixing ensures letterplate can only be removed from the inside of the house Prevents burglars gaining access to the cylinder internally
- Optional restricted opening with the addition of a PAS24 Letterplate Restrictor Possible to restrict the opening angle, or lock the flap shut

*Fire resistance requires fitting of intumescent layer which has been tested in conjunction with the letterplate on a timber door section to achieve 60 minutes of fire resistance. This is an indicative test and the door fabricator may need to conduct their own fire tests on a complete door set in order to meet specification requirements.

**For best acoustic and weather performance we recommend installing the product with a rubber gasket

The Future of Home Security

Unfortunately, crime doesn't stand still. That's why we can't be complacent about home security.

At Fab&Fix, we are always working to stay two steps ahead of the break-in.

We start by putting ourselves in the mind of the intruder. What are the weaknesses they know how to exploit today and where are the loopholes they may learn to exploit tomorrow?

If our findings mean tearing up convention and designing from the ground up, that's what we do. High-tech materials, precision engineering and even microelectronics then bring the products to life; but we don't take them to market, yet.

Our testing partners, are masters of the break-in. Skilled locksmiths, fabricators in the UK's most crime ridden areas and the Police. Only when they're satisfied are our products released.

Safe  Secure

Horizon[®]

Multi-point Door Lock

Boldly going where no door lock has been before

Three years in development, this visionary range of door locks re-writes the rulebook on ease of fitting, smoothness of operation and reliability. They're versatile too; designed to fit with almost any system, universal components wherever possible to reduce stock holding, plus residential and french door applications.

All in addition to the highest standards of security and durability you've come to expect from Fab&Fix.

Horizon[®]

Multi-point Door Lock

Heavy gauge metal gearboxes to prevent twisting

Far fewer moving parts and greater internal tolerances for new levels of reliability

Unidirectional gearing, Final Drive System™ and Friction Free™ keeps for the smoothest action

Range compatible with UPVC, composite and timber systems; masters and slaves; 1 piece and 3 piece keeps; all of your door lock needs can be met by one supplier

Fully reversible latch – no more complicated than turning over the lock

Key measure guide lines on locks and keeps for faster, more accurate mark-up and cropping

Pre-stamped fixing holes and face plate retainers as standard so no need to drill any fixing holes

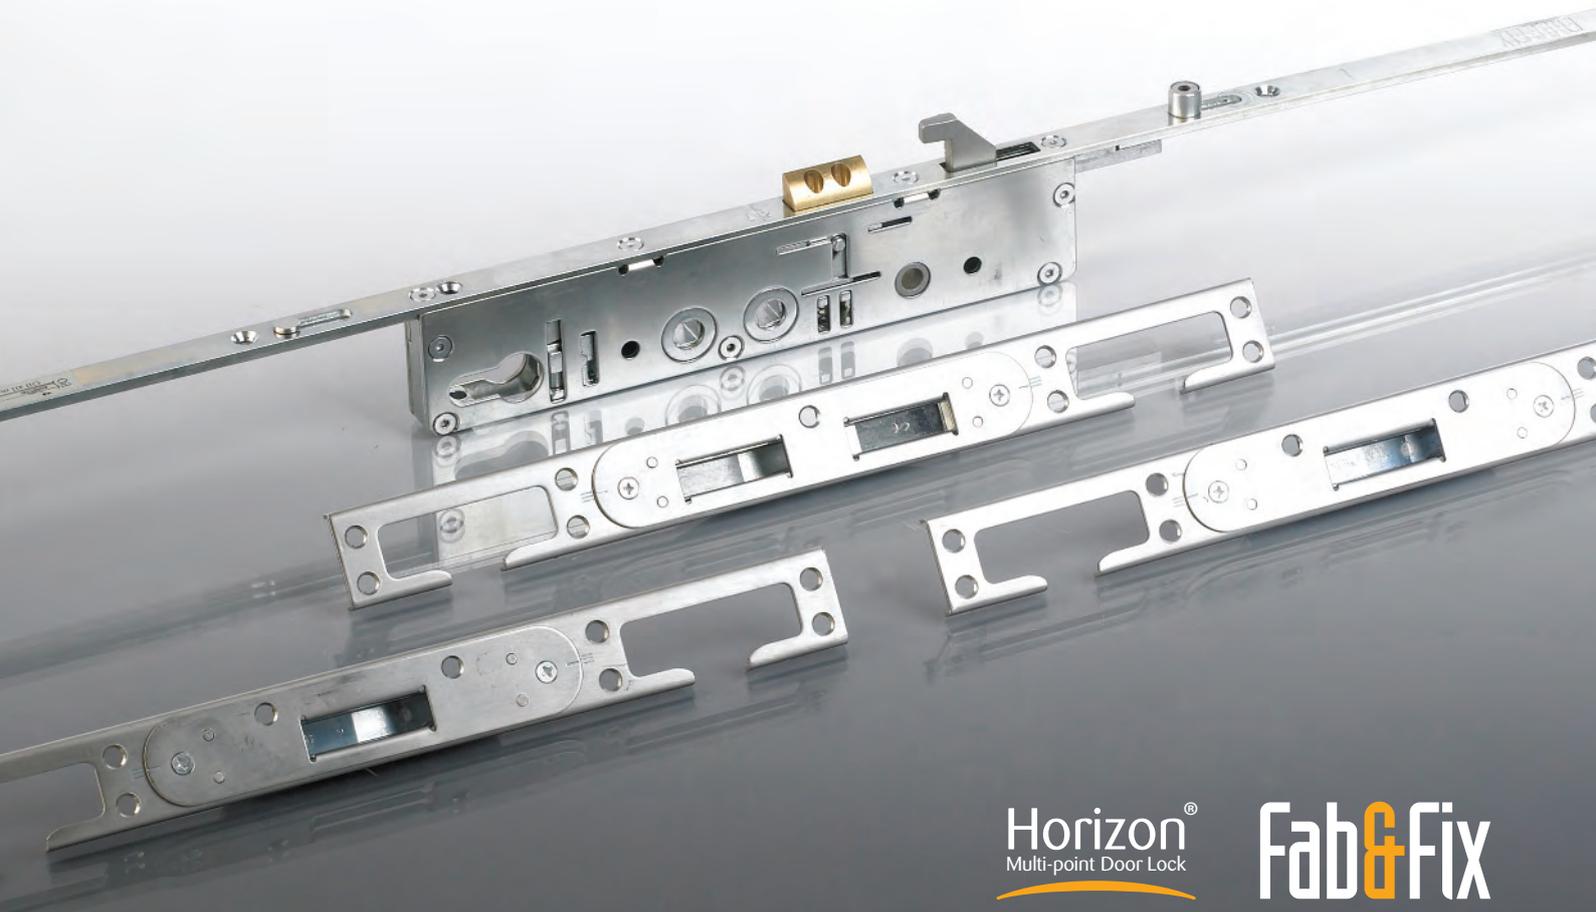

Optional shootbolt and cam extensions for increased security or compression as you need it

Horizon 1100 Door Lock and 3 Piece Keep

Features & Benefits

- Multipoint door lock for use with 92mm PZ sprung handles and euro cylinders
Suitable for most residential applications with wide choice of handles and cylinders
- 3 bi-parting, anti-separation, investment cast stainless steel hooks
Prevents lifting and jimmying
- 3 precision rollers
Tight compression across the whole door, excellent weather sealing
- Optional shoot bolt and cam extensions
Extra security or compression as required
- Universal, non-handed keeps with profile related packers
Compatible with all major profile systems

Berwick Inline Lever Lever

Internal Lever

Features & Benefits

- High security door handle compatible with all euro cylinders
Achieve PAS24 with a standard anti-bump cylinder (no need for an anti-snap cylinder)
- Tested to the latest version of PAS24:2012
Surpasses the latest British standard for high security door furniture on a new door set (with appropriate anti-bump cylinder)
- Solid extruded aluminium baseplate
Acts as a cylinder guard, preventing attack on the cylinder by an intruder
- Rigid cast steel M6 screw fixings and high tensile steel screws
Prevents backplate removal limiting direct attack on lock cylinder

Designed  Delivered

Bespoke Design

Custom projects demand custom hardware.

Because Fab&Fix has a dedicated design and manufacturing capability, we can work with you to adapt our existing range or create products entirely from scratch to fit your needs.

The perfect balance of Form & Function is at the heart of all our bespoke designs. That means attention to every detail, be it a finish that suites with other products you are using, or precision engineering to meet the rigorous new testing standard that will give you the competitive edge.

We can supply any of the commissions on the pages that follow. If you've got something else in mind, give us a call and we'll look forward to discussing your requirements.
